DETAILED ACTION

Election/Restrictions

1. After review of the claims of the instant application, the restriction requirement imposed by the previous Examiner in Paper No. 8, dated 11/5/02, and the invention elected by the Applicant (i.e. Invention I, Claims 22-33, 72-82) in Paper No. 10, dated 1/21/03, the Examiner respectfully withdraws the restriction requirement of Paper No. 8, dated 11/5/02, in view of the two patentably distinct species (i.e. an optical system for verifying the authenticity of an object and an optical system for encrypting a set of data, both systems comprising a signal source and at least three subsystems) recited in Claims 22-33, 72-82. The Examiner apologizes for any inconvenience this may have caused.
2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 22-33, 72-82, drawn to systems for verifying the authenticity of an object and encrypting a set of data comprising a signal source and at least three subsystems, classified in Class 359, subclass 559+.
 - II. Claims 34-53, drawn to a method of verifying the authenticity of an object comprising encoding, convolving, transforming, and correlating images, classified in Class 382, subclass 100.
 - III. Claims 54-71 and 83, drawn to a method of encrypting a set of data, classified in Class 380, subclass 54.

The inventions are distinct, each from the other because of the following reasons:

Art Unit: 2872

3. Inventions I, II, and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as optical processing. In the instant case, invention II has separate utility such as image recognition. In the instant case, invention III has separate utility such as data encryption. See MPEP § 806.05(d).

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II or III, restriction for examination purposes as indicated is proper.

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

7. This application contains claims directed to the following patentably distinct species of the claimed invention:

If Invention I is elected, then one of the following two species must also be elected:

Species 1- Figures 1 and 1A, drawn to a system for verifying the authenticity of an object, the system comprising a signal source and three subsystems.

Species 2- Figure 13, drawn to a system for encrypting a set of data, the system comprising a signal source and four subsystems.

Art Unit: 2872

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, Claims 22-28 are generic only to Species 1 and 2 of Invention I.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 2872

8. The claims are deemed to correspond to the species listed above in the following manner:

Species 1: Claims 29-33.

Species 2: Claims 72-82.

9. A telephone call was made to Philmore H. Colburn II (860-286-2929) on 3/7/03 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Arnel C. Lavarias whose telephone number is 703-305-4007. The examiner can normally be reached on M-F 8:30 AM - 5 PM.
